### DETAILED ACTION

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claims 1-12, drawn to a method marking bread with a predetermined pattern.

Group II, claims 13-25, drawn to an apparatus for marking bread with a predetermined pattern.

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special feature linking the two inventions is a bread with a predetermined pattern, which does not provide a contribution over the prior art as evidenced by Olney. On page 30 and 31, note the pretzel dough is coated with water, sprinkled with salt or aromatic seeds (i.e. flour or the like) in predetermined pattern, and baked.
